

HAND & LASER ETCHING

Etchings on memorials, introduced in the 70's remain today as the principal form of personalization. The presentation of one's own artwork, portrait, hobby, or special place, brings back all these wonderful memories. Whether

created by hand from a collection of photos or through computer generated high tech laser etchings, the beauty will show through.

Clear, clean photos to work from allow our artists to do the very best job possible. The artwork shown in this brochure reveals only some of the designs available to choose from. When you

consider the memorial that will be the tribute to your loved one's life, consider an etching as a way to personalize your memorial.

PORTRAIT ETCHING

Portraits are the ultimate in personalization. By using the laser reproduction process, a loved one's portrait can be permanently etched onto the face in black granite. Another portrait option is to etch on a thin black granite tile and inset this flush into the face of any memorial color.
